

“Enhanced

**NICU caregiver
sensitivity to infants' cues is
believed to be
critical in the
infants' outcome.”**

Als, H., Gilkerson, L., Duffy, F.H., McAnulty, G. B., et al. (2003). A three-Center, randomized, controlled trial of individualized developmental care for very low birth weight preterm infants: Medical, neurodevelopmental, parenting and caregiving Effects. *Journal of Developmental and Behavioral Pediatrics*, 24(6), 399
